Classic swing frame

We have a selection of classic swing frames if all you want is a simple frame without any paintwork or decorative gable elements. The swing frames come in all sizes and with a choice of seats to suit every need.

Swinging is physically beneficial because it develops children's gross motor skills, balance and body awareness – this happens when they help others have a go on the swing, when they jump up onto the swing and start swinging, and when they hop off again. Gripping the rubber-clad chains trains the children's muscle coordination and fine motor skills in their hands and fingers, which is helpful when they have to learn to write, for example.

The frame is extra high, so that it can also be used by older children and adults wanting to have a swing. The swing frame is also supplied without seats, which gives you the freedom to buy one of our four different seats.

Specifications

Article number

1180: In-ground mounting

Product dimensions (LxWxH)

346 x 261 x 260 cm

Approximate installation time

2 persons 3 hours
