Swing frame for explorers

Our Explore series has a selection of swing frames to suit every need. All the Explore models feature painted frames and a decorative gable element that matches the Explore series' themed universe and which stimulates role-play and imagination.

One of the benefits of swinging is that it helps children to better regulate sensory inputs and impacts. When swinging back and forth, they practise adapting to different sensory impressions from the outside world. This can help improve concentration, as it trains the children's ability to ignore unwanted inputs, such as classroom noise.

The frame is extra high, so that it can also be used by older children and adults wanting to have a swing. The swing frame is also supplied without a seat, which gives you the freedom to buy one of our four different seats.

Why choose LEDON Explore?

- Low-maintenance play equipment in natural colours.
- In particular, it challenges and stimulates children's social skills, motor skills and balance.
- The play systems come in a wide range of sizes and price classes to suit every need.
- A theme world that arouses children's natural interest in experiencing and exploring the world.
- The largest theme world with many different items of play equipment for the entire playground.

Specifications

- Article number**
1180EXA: In-ground mounting
- Product dimensions (LxWxH)**
346 x 261 x 279 cm
- Approximate installation time**
2 persons 3 hours
