Classic swing frame

We have a selection of classic swing frames if all you want is a simple frame without any paintwork or decorative gable elements. The swing frames come in all sizes and with a choice of seats to suit every need.

One of the benefits of swinging is that it helps children to better regulate sensory inputs and impacts. When swinging back and forth, they practise adapting to different sensory impressions from the outside world. This can help improve concentration, as it trains the children's ability to ignore unwanted inputs, such as classroom noise.

Modular swing frame

A modular swing frame makes it possible for several children to swing at the same time. In addition, the modular swing frame is available in several different combinations, which can be tailored to specific age groups or span a wide age group depending on which seats are chosen.

The swing frame is supplied without seats, which gives you the freedom to buy three of our different seats.
